

I subscribe to XM radio because of the quality and variety available. Please reject 04-160 and allow XM subscribers to continue to listen to traffic and weather channels, in addition to the numerous other stations included with this service. I would actually like XM radio to expand to include more local traffic and weather. As a mother, XM radio is a safe way to entertain my family while in the car or at home. Driving my children to school in the morning before XM radio meant I had to constantly switch the stations to avoid inappropriate discussions and comments. Where was the music? After having XM radio for one month, FM radio is a thing of the past in our family. FM radio needs to learn how to compete with XM radio ON THEIR OWN without the help of our government. Please reject 04-160.
